

Collagen Eye Mask & Pads

The Collagen Eye Mask & Pads are made of a native network and of a monomer soluble collagen. The mask is based on the original structure of collagen in the skin, having extremely high water absorbing capacity similar to the skin's connective tissue. The intense collagen eye treatment will leave the eye area more hydrated, and assist in alleviating dark circles and puffiness.

Usage:

- **Set the facial steamer or prepare hot towel cabi with towels.**
- **Pre-moisten the face using your fingertips.**
- **Apply the mask and lightly press into face.**
- **Cover the areas with a warm towel and apply light pressure to saturate the mask or hold the mask into place using steam until the mask is thoroughly saturated.**
- **Leave on the client for a minimum of 20 minutes with the steam or carefully change warm towels as needed.**
- **The mask will turn into a gel-like substance that can be removed easily.**
- **Blot the client's face with tissue.**
- **Apply a protective eye cream or gel.**
